**** SLC - STUDENT LED CONFERENCE 2024-25 ****

A Unique Platform for Students to Showcase the Quality of Learning in Our School to Parents

The Student-Led Conference (SLC) is an innovative and unique educational event that offers students a dynamic platform to actively engage with their parents, guiding them through the progress and achievements of their academic journey.

SLC places the students at the center, enabling them to take ownership of their learning and articulate their strengths, challenges, and personal growth.

Purpose and Importance

The primary purpose of the Student-Led Conference is to foster a deeper connection between students, their learning, and their families. By leading the discussion, students develop key skills such as self-reflection, communication, and accountability. At the same time, parents gain a more holistic view of their child's learning experience, which helps in building a **collaborative and supportive relationship between the school, students, and families.**

Student Empowerment

At the core of the SLC is student empowerment. Students are given the responsibility to present their work, explain their learning process, and discuss how they've applied the skills and knowledge gained throughout the academic year. This not only boosts their confidence but also reinforces the idea that they are the drivers of their own learning journey.

A Showcase of Learning

During the conference, **students typically present a portfolio that includes examples of their best work, academic reports, and reflections.** This showcase provides a comprehensive look at the student's academic and personal development over a period of time. It allows parents to see firsthand the depth and breadth of what their child has learned, highlighting not only academic achievements but also growth in areas such as **creativity, critical thinking, problem-solving, and social-emotional skills.**

This engagement makes learning more meaningful and relevant, reinforcing the idea that education is not just about grades but about lifelong skills and knowledge.

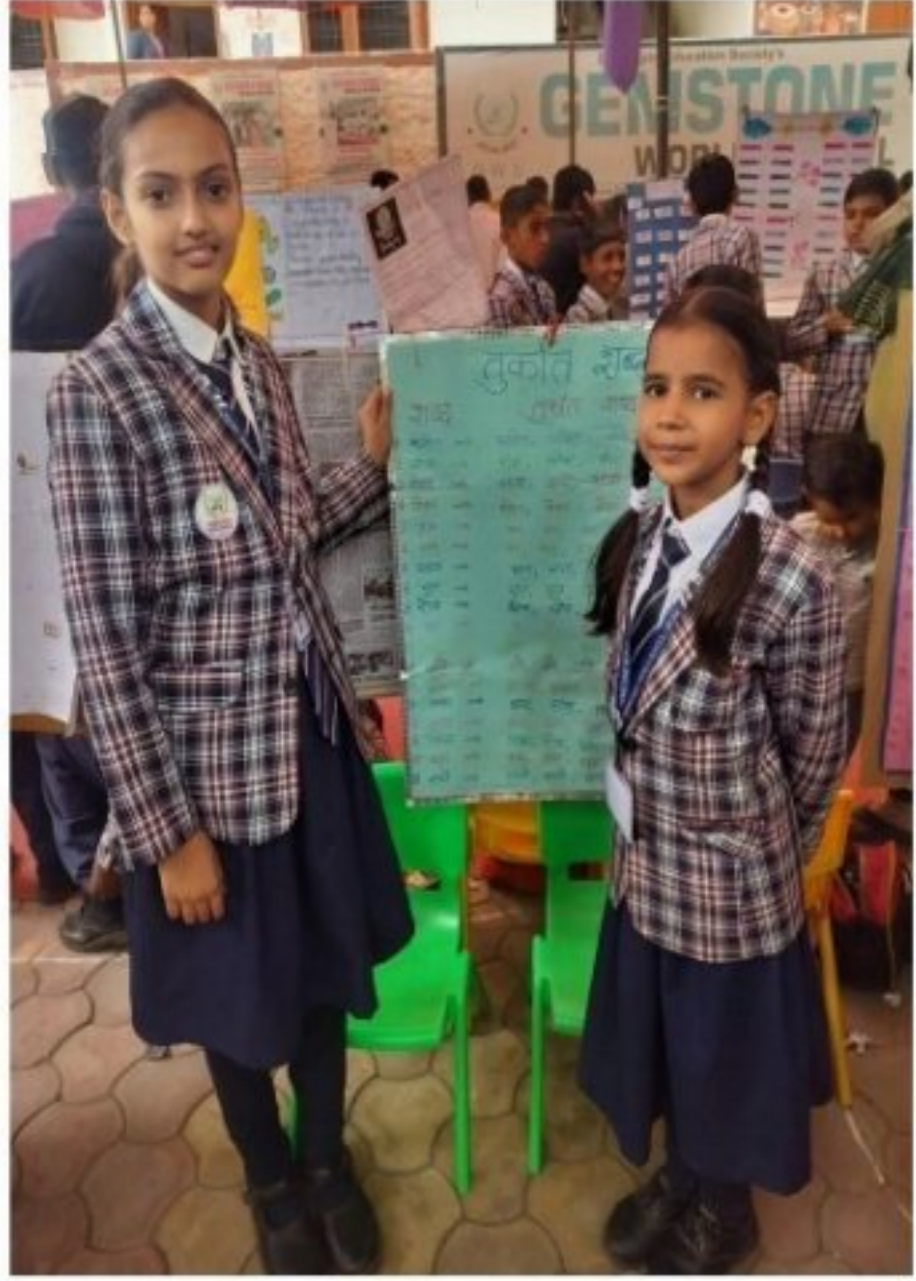

Building Parent-Child-Teacher Collaboration

The SLC also serves as a bridge for communication between the student, parent, and teacher. It offers a rare and valuable opportunity for parents to hear directly from their children about their learning experiences.

Furthermore, teachers are often present to offer additional context and to provide support where needed. This collaborative environment ensures that all parties are aligned and working together to support the student's growth.

SUBJECT	PROJECT NAME	OUTCOME OF PROJECT	PHOTOS OF THE PROJECT
ELGA	<p>Sight words</p> <p>My family</p> <p>Naming words</p> <p>Articles- A, An, The.</p> <p>Adjective Gender.</p> <p>collective noun.</p> <p>Story telling.</p> <p>Sentence formation.</p> <p>Noun.</p> <p>Adjective.</p> <p>No bullying.</p>	<p>Learned to read spelling</p> <p>Student can speak 5 about their family</p> <p>Learn to identify letters with different words.</p> <p>Learn types of articles with uses.</p> <p>Different types of adjectives. Learn in different ways.</p> <p>Learns singular and plural nouns</p> <p>Learned how to identify adjectives.</p> <p>Learned how to identify nouns.</p> <p>Learned about the different types of adjectives.</p>	  

MATHS	<p>Shapes</p> <p>Make a patterns</p> <p>Addition</p> <p>Multiplication</p> <p>Division method</p> <p>Ascending and descending order</p> <p>Word formation</p> <p>Place value - 8 & 9 digit Number</p> <p>Measurement</p>	<p>Learned to identify shape.</p> <p>Learned to identify different patterns.</p> <p>Learned how to do additions</p> <p>Learned how to do multiplication</p> <p>Learn how to do division.</p> <p>Learned how to do ascending and descending order word formation.</p> <p>Learned how to identify the place value of numbers.</p> <p>Learned about the different ways of measurement..</p>

BIOLOGY	<p>Vitamin and their Sources</p> <p>Photosynthesis</p>	<p>Learned about vitamins and their Sources.</p> <p>Learned about the process of Photosynthesis.</p>	

CHEMISTRY

Filtration

Separated insoluble solid from solid liquid Solution.

Separating solid liquid mixture.

Learned about some acidic solutions & some basics.

SOCIAL STUDIES	Day and Night	Students understand how day and Night caused due earth's rotation	 
	Layer of atmosphere.	Students understand and know about different layers of atmosphere.	
	Greenhouse effect.	Students understand the greenhouse effect occurs when greenhouse gases in a planet's atmosphere insulate the planet from losing heat to space, raising its surface temperature.
